

HOMEWORK (today)
(page 13 1-6)

ii)

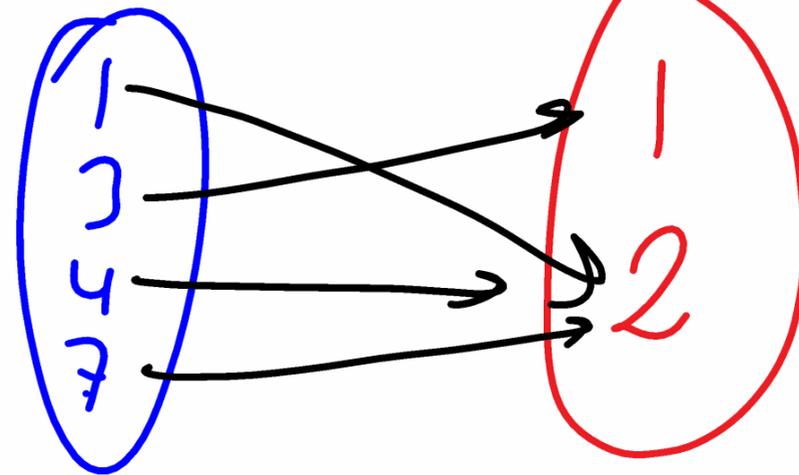

Domain = $\{ 1, 3, 4, 7 \}$

Range = $\{ 1, 2 \}$

THU 4 OCT 2018

Domain

Range

ii) It is a function
BECAUSE

EACH element of the domain
has **ONE-&-ONLY-ONE ARROW**

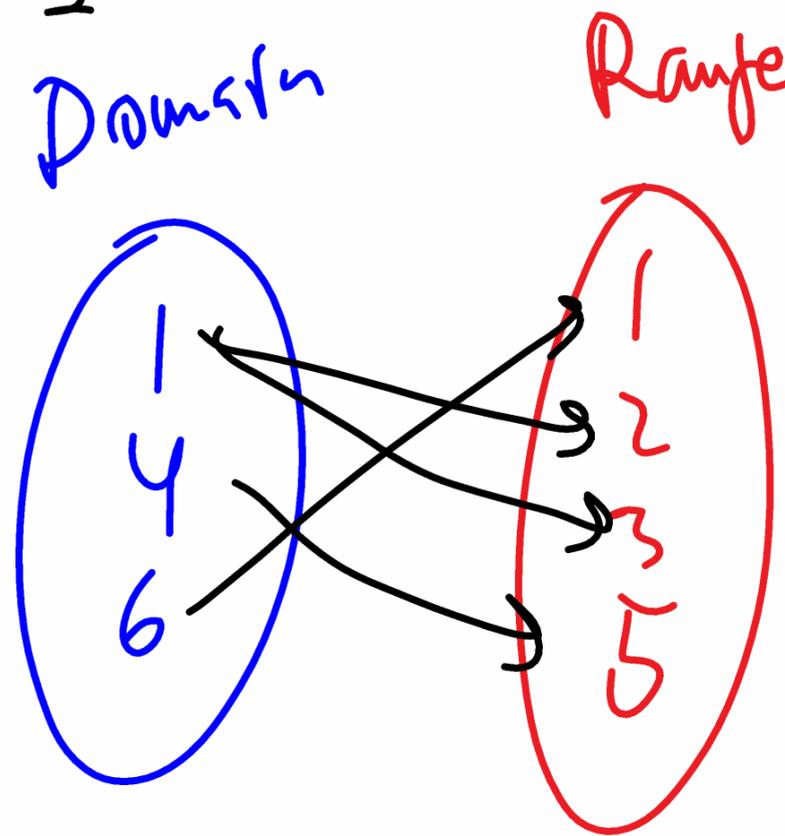

$$14) h = \{ (1,2), (1,3), (4,5), (6,1) \}$$

$$\text{Domain of } h = \{ 1, 4, 6 \}$$

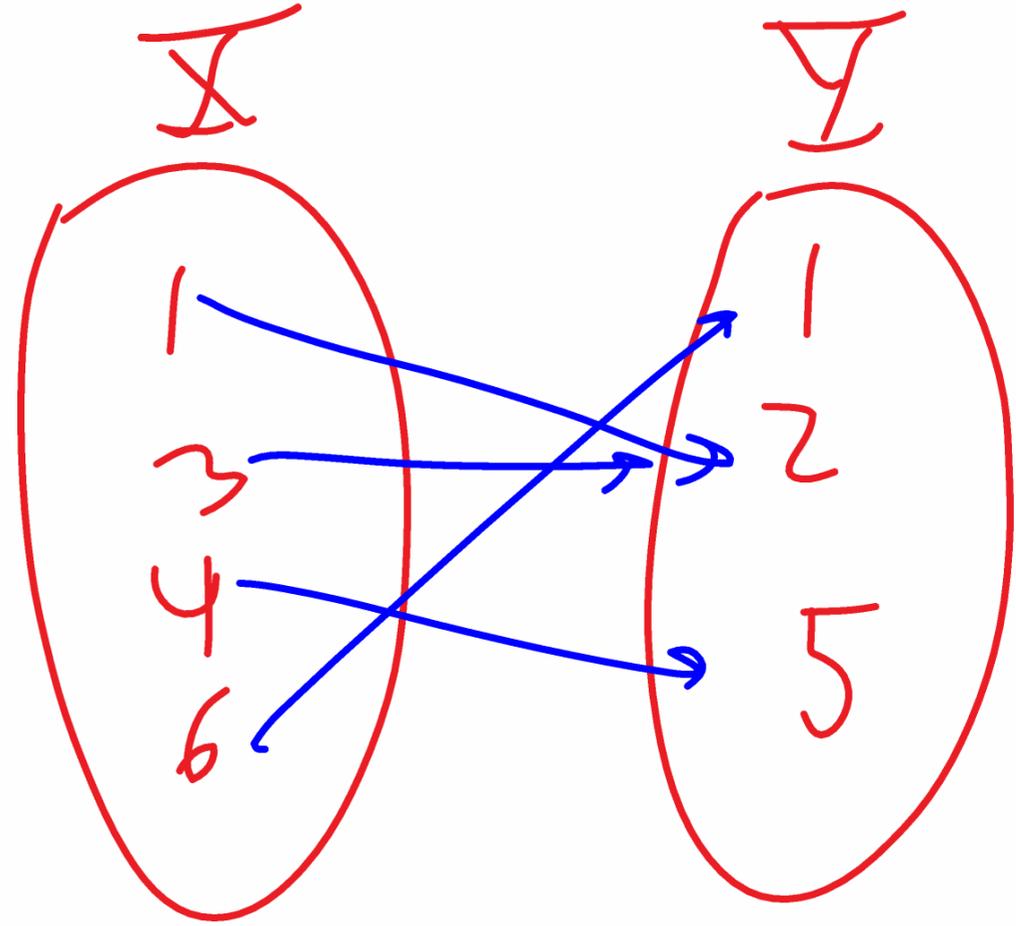

$$\text{Range of } h = \{ 1, 2, 3, 5 \}$$

Domain	Range
1	3
1	2
4	5
6	1

NOT A FUNCTION
because 1 is source of 2 orders

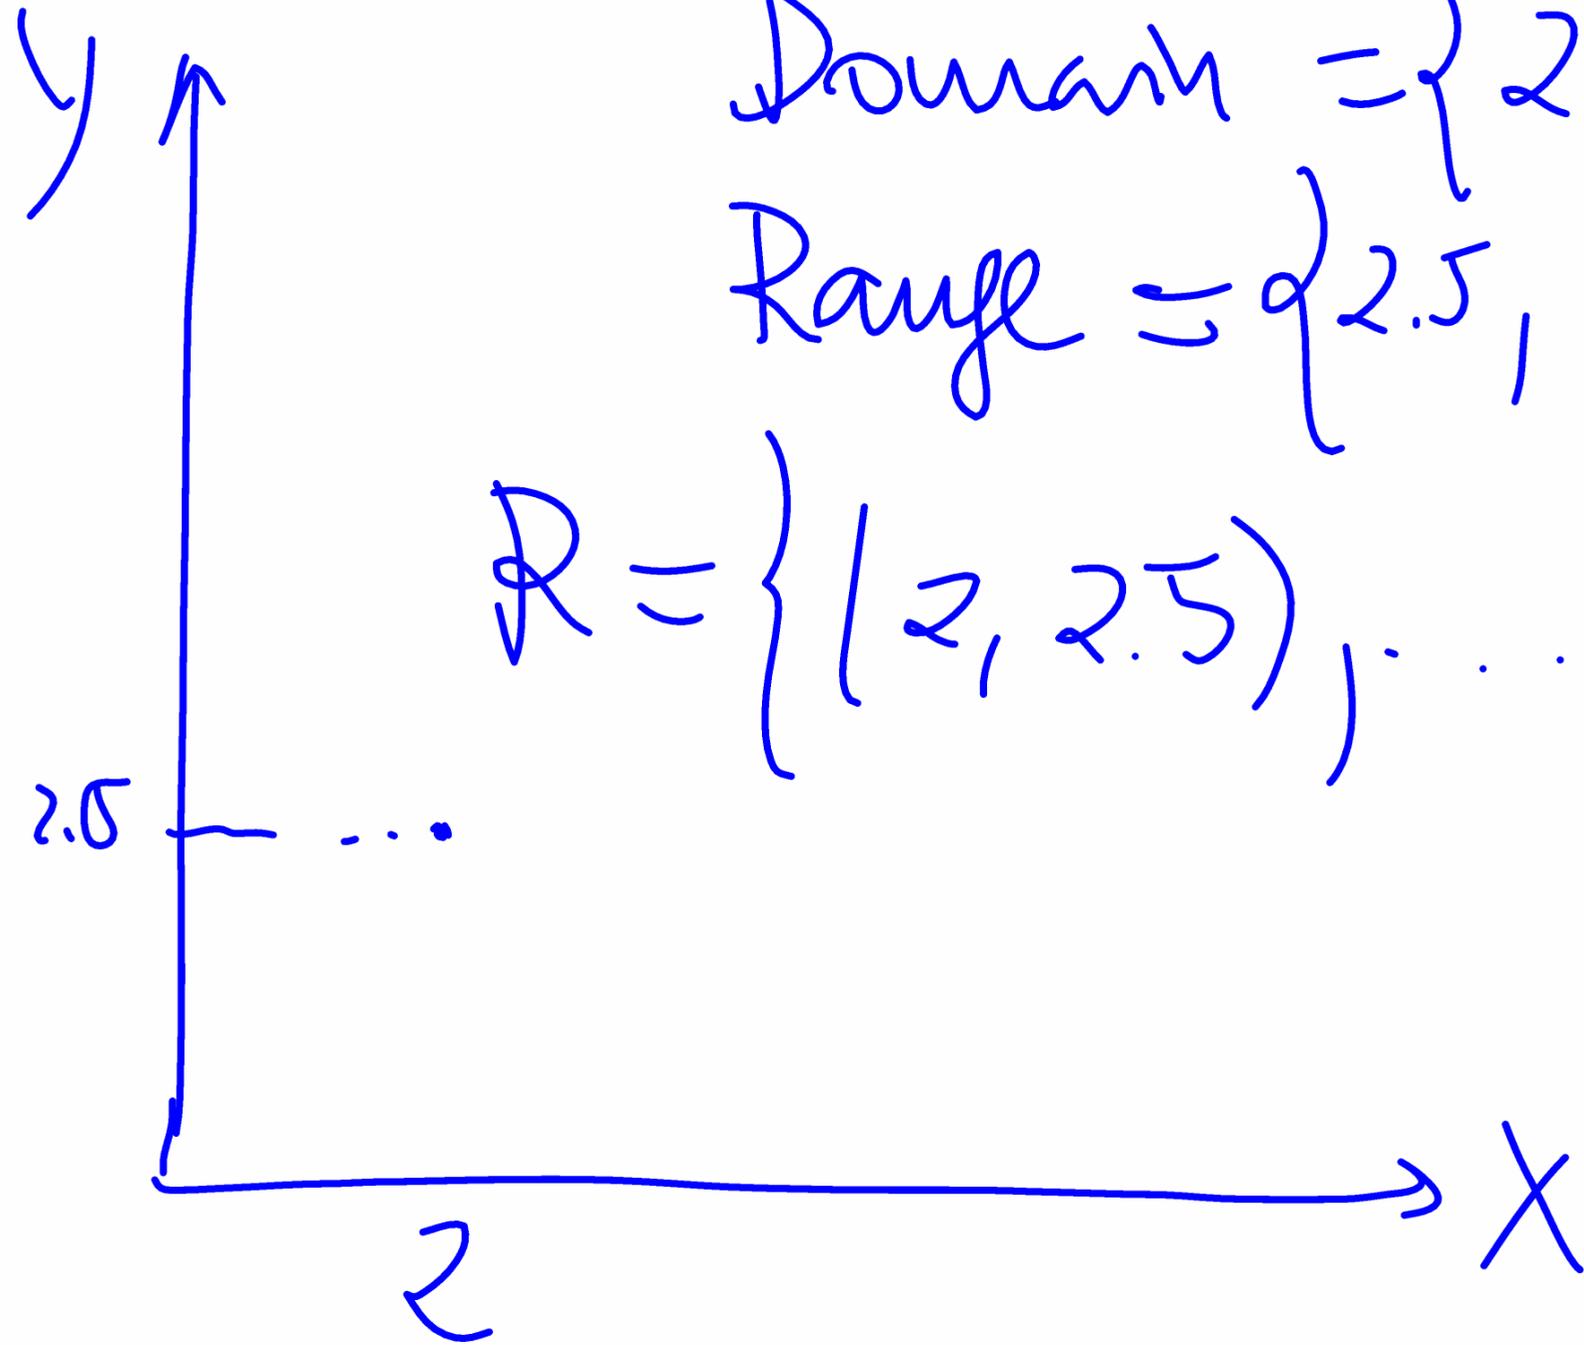

2a)

Is a function because
each element of the Domain X
has one single arrow

3) a)

$$\text{Domain} = \{2, 3.5, 5, \dots\}$$

$$\text{Range} = \{2.5, \dots\}$$

$$R = \{(2, 2.5), \dots\}$$
